Medals by Abraham and Abraham Abramson

This collection of about 200 medals and coins designed by Abraham and Abraham Abramson has been assembled by the late Mr. Martin Valentin of Munich, Germany over a period of over 40 years and shows the result of an ardent collector and student who did not mind labor and expenses to build up this unique collection. At the request of his nephew we have cataloged the collection and we felt obliged to not only prepare an auction sale catalog, but also an accurate and comprehensive listing for approval of the serious collector. The reference works consulted in the writing of this catalog are listed below for the benefit of the collector who may wish to go with the subject more deeply than this catalog. The merit of both artists lies especially in the fact that they stimulated by their work a veritable renaissance of medallic art in Prussia which hitherto had displayed a deplorably low and primitive state of workmanship. As a consequence of continuous warfare and of a spirit strongly devoted to military education, the fine arts had depreciated after a glorious period of highly perfected die cutting during the reign of the Great Elector. Frederic the Great, however, fully recognized the propagandistic value of the medal and favoured many medallists of German as well as foreign birth. Among the engravers in the Kings employ, the forementioned Abraham and Abraham Abramson were the most talented personalities. They combined artistic skill and accomplished workmanship with an abundance of new ideas of their own. The number of outstanding medals is too great to permit any particular mentioning in the descriptive part of the catalog. May this catalog fulfill his task and be a modest contribution to the Numismatic world.
